EDUCATION

- New York University** *Ph.D. in Economics* (New York, NY) 2023
- Fields: Applied Econometrics, Labor Economics, Quantitative Macroeconomics.
- Universidad de San Andrés** *Master of Science in Economics* (Buenos Aires, Argentina) 2013
- Valedictorian.
- Universidad de Buenos Aires** *Bachelor of Science in Economics* (Buenos Aires, Argentina) 2011
- Summa Cum Laude - Valedictorian - Historical Top 40 GPA award.

SKILLS

Technical Skills: Causal inference, experimental design, data analysis, machine learning, structural model estimation.
Programming Languages: Python, SQL, R, Stata, Matlab.

EXPERIENCE

Economics Expert, Scale AI April 2023 - Present

- Currently training a generative AI model on economics.

Graduate Researcher, New York University 2016 - 2023

- Applied instrumental variables methods and performed hypothesis testing to study the effect of increased import competition in the US on labor and marriage market outcomes.
- Implemented text analysis, event study, and difference-in-differences designs on scraped data from Glassdoor.com to study the effect of female leadership presence in firms on workers' satisfaction during the COVID-19 pandemic.
- Developed a dynamic general equilibrium model to study the effects of assortative mating on intergenerational mobility. Designed a novel dynamic programming algorithm to estimate the model via simulated method of moments. Employed the estimated model to forecast mobility under different counterfactual scenarios.
- Recruited and supervised a team of research assistants, ensuring efficient project coordination and successful outcomes.
- Advanced partnership with Merlin Jobs for research and consulting collaboration to enhance their job matching and recommendation engine algorithms.
- Delivered compelling presentations, effectively communicating complex concepts, methodologies, and findings to diverse audiences.

Research Assistant, Universidad de San Andrés 2014 - 2015

- Managed multiple project areas simultaneously, including building novel data sets, data analysis, structural modeling, and Simulated Method of Moments estimation to study the dynamics of exporting firms.
- Recruited and mentored a research assistant to succeed me.

Research Assistant, United Nations Development Programme 2011 - 2012

- Built statistics and data visualization for the 2013 Human Development Report.
- Wrote briefings for non-academic audiences.

LEADERSHIP AND COMMUNICATION EXPERIENCE

Seminar Creator and Organizer, New York University 2017 - 2018

- Created and organized the successful "Student Applied Micro Lunch" series, a weekly seminar where students present their research to peers and professors. This initiative has now become an integral part of the Ph.D. program.

Teaching Fellow in Microeconomics, NYU Stern School of Business 2017

- Taught advanced material in weekly sessions of 20 students; led one-on-one meetings and tutoring sessions.

Lecturer for Microeconomics, Advanced Math, and Econometrics, Universidad de Buenos Aires 2007 - 2011

- Developed curriculum and taught advanced material in weekly sessions of between 30 and 150 students; prepared course syllabi and problem sets; wrote and graded final exams.

ACADEMIC SERVICE

Referee for peer-reviewed journals: Journal of Economic Behavior & Organization.

SELECTED AWARDS

McCracken Fellowship, New York University	2015 - 2021
Masters Merit-Based Fully-Funded Fellowship, Universidad de San Andrés	2011
